

## **The Curzon CE Primary School**

### **Pupil Premium Grant 2019 - 2020**

Pupil Premium is an amount of money paid into school in regard of the following:

- Pupils who receive Free School Meals [FSM]
- Pupils who have parents employed by the armed forces.

At The Curzon CE Primary School, Pupil Premium money is used to ensure all FSM children and LAC children are supported in making at least good academic progress, with the aim of making at least expected progress.

Total Amount Delegated to this school 2019 - 2020: £8290.

#### **How do we use the Pupil Premium Grant at The Curzon CE Primary School?**

Following an analysis of the needs of FSM children in our setting and pupil progress and attainment analysis, we plan to spend our pupil premium grant 2019 - 2020 for the following:

##### **Small group intervention sessions**

We support a range of children which include those with learning needs, behaviour difficulties and social/emotional needs. Some of our work supports children in small group activities to enable them to make as much progress as they are able. Some groups are focused particularly on early reading and phonics. Others focus on maths, writing and building social and emotional skills and resilience.

##### **Enrichment activities**

The pupil premium budget is used to subsidise school visits, activities where parental contributions are requested and after school clubs or music tuition for those children where payment is a barrier to participation. Families currently entitled to free school meals can have access to these activities subsidised if needed to ensure that children can take part. Forest school activities are also provided.

##### **Impact on Attainment**

We are constantly evaluating the impact of this funding. We look at individual attainment and progress in detail on a termly basis. We use teacher

assessment of attainment and also discuss children's achievements more widely. The employment of these initiatives in school aims to:

- Allow children to keep pace with their peers in learning
- Reduce anxiety and other behavioural issues to enable children to access learning, work in groups with others more successfully, organise their learning and complete homework
- Enable children to gain confidence in areas of Maths and English that they may find challenging
- Enable us to plan exciting visits to enhance and enrich the curriculum.
